

Introducing the New Patent Pending

Multi-Purpose Measuring Tool – “For Contractors By Contractors”

**Amazing New Tool Saves You Time
and Space in Your Tool Belt!**

- **MAGNETIC TORPEDO LEVEL**
WITH PIPE LINE V-NOTCH
- **T-BEVEL**
- **SPEED SQUARE**
WITH PITCH=DEGREE CONVERSION TABLE
- **PLUMB BOB**

- **PITCH MEASUREMENT:**
1 PITCH THROUGH 20
- **ANGLE MEASUREMENT:**
0-360 DEGREES IN 5 DEGREE INCREMENTS
- **16-INCH STEP-OFF TOOL**
- **AND MORE!**

**Great for virtually any trade! Including Carpenters, Framers, Roofers,
Siders, Plumbers, Electricians, Ship Builders, Do-it-yourselfers and more!**

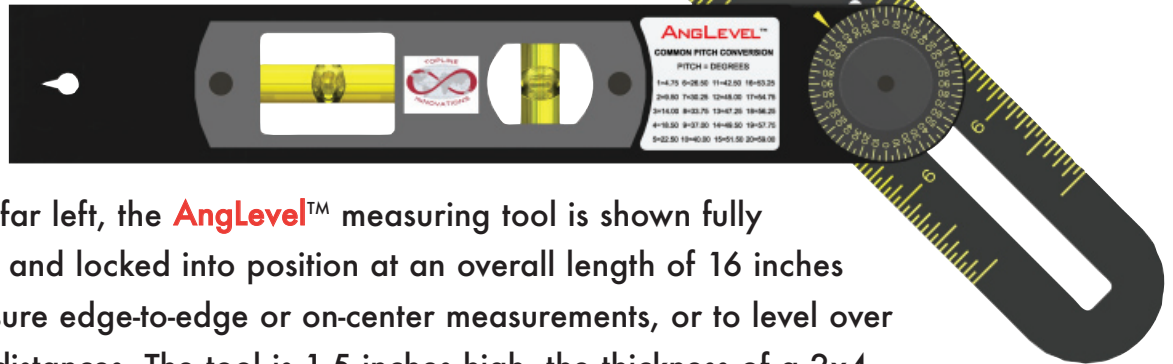

*** Metric System Version Also Available**

At right, the **AngLevel™** measuring tool performing the same function as the “T-Bevel”. Note the v-notched hole on the left for connecting a plumb bob.

On the far left, the **AngLevel™** measuring tool is shown fully opened and locked into position at an overall length of 16 inches to measure edge-to-edge or on-center measurements, or to level over longer distances. The tool is 1.5 inches high, the thickness of a 2x4 stud. The **AngLevel™** tool when fully closed is 9” inches in length.

At left is a closer look at the **QuikPitch™** measuring scale and the degree dial, which play a role in replacing your speed square. The **AngLevel™** tool is much faster, easier, and less cumbersome than other tools. To the left of the degree dial, the tool includes a pitch conversion table to quickly and easily convert pitch to degrees, or degrees to pitch.

SOME USES OF THE **ANGLEVEL™** TOOL

- Plumb bob (plumbing)
- Combining the angle and level features to pitch pipe for proper drainage (plumbing)
- Measurement step-off tool
- Performs speed square functions
- Simplifies rafter cuts
- Level distances up to 16 inches using pivot
- Depth of tool is 3/4 inch for marking stud center (framing)
- Width is 1.5 inches for marking stud edge (framing)
- Length of **AngLevel™** tool fully extended is 16 inches for framing layouts
- Pitches can be found quickly and easily with the tools' **QuikPitch™** technology
- Amazingly easy to find difficult angles with the use of a string line and the tools' level and angle finding features.
- Can identify angles with ease using the tools' convenient angle dial
- Performs T-bevel functions
- Magnetic Torpedo Level uses rare earth magnets that are several times stronger than strip magnets
- Simplifies cut-outs for electrical boxes
- Use when bending conduit to desired angles
